Powered by Oracle, Perfected by PCB Apps.

JDE EnterpriseOne Grower/Blend Management System- PCB Apps Overview

3 Executive Drive, Suite 329
Somerset, NJ 08873

(732) 302-0100

Key Benefits

- Manage land, crop, and harvest attributes by quickly accessing data for each block of land
- Track the anticipated harvest estimate for each block of land
- Roll up each activity cost into the total operational cost of the crop
- Track operational costs for each harvest
- Receive crops into internal processing facilities from internal or external farms and capture weight, grade, and quality results.
- Integrate crop contracts that are entered in JDE EnterpriseOne Grower Pricing and Payments to secure accurate crop pricing and adjustments.
- Manage grower contracts and allow for complex pricing structures
- Create settlements reconciling schedules, payments, penalties and bonuses, and vouchers
- Define and manage blend activities in JD Edwards Blend Management System
- Manage vessels and view current blend lot attributes in a vessel, as well as planned lots, and a history of lots from completed operations
- Ship your blended lots either in bulk or bottles, with a complete and detailed bottling processing operations traceability
