

JBF Industries Limited S4HANA 1610 Support

SAP S4 Hana 1610 Support Services

About JBF

JBF is one of the leading Polyester value chain company not only in India but abroad. The company is among the Top 5 domestic market leaders in textile grade chips, bottle grade chips and partially oriented yarn. Internationally, JBF is also amongst the Top 10 manufacturers of bottle grade chips and polyester films. JBF's brand value has made its products well accepted by a majority of domestic customers as well as many multinational corporations.

Since 2003 JBF was using JD Edwards E19.1 and migrated to SAP S/4 HANA 1610 in Jan 2019. SAP Modules implemented are FICO, MM, SD, EXIM, PP, and WM. Along with third party applications like Barcoding, Scanners, Weighbridge etc. are integrated with SAP

Challenges

- During the migration from JDE to S/4 HANA the implementation was not up to the business expectations & had bugs in Process Mapping, Production Planning and Control, Inventory, Sales Order Management, Import Export and other critical areas
- Improper Server Configuration
- Customer was not able to prepare the Annual Balance sheet as the Inventory valuation process was incorrect
- Production Planning and Controlling Module had severe problems with product costing
- Incorrect tax setups and incomplete reporting
- Lack of training to users across locations
- Incomplete Process and Configuration documentation

Solutions

- Immediately after taking over the support we did a complete System Audit and requirement gathering with Business Owners and Core
- Based on the interaction with the users we prepared a support plan and System Maintenance Technical Document documents of all business processes along with customized ABAP Reports
- Identified and prioritized Business Critical issues for resolution along with end user training
- While training the business users, fixed the mission critical processes and streamlined the instance
- Priority was given to assist the client in material valuation by gathering necessary information from SAP system to complete the Balance Sheet for the financial year 2018-2019
- Major activity was performed to merge the plants and fulfill business needs
- New sales reports documents prepared for the Sales and Purchase Register were developed to the satisfaction of the client

Organizational Benefits

Meeting Business Critical Requirements
Mission Critical Reports
Inventory Valuation
Plant Merge
Trained Users
